

Sleater Kinney, Night Light

Oh little light
That shines for me in the dark of night
Oh little sigh
Sometimes I follow you all the way home
I would almost have to ask you
I hate to be led
So give me a spark I can look for instead

How do you do it
This bitter and bloody world
Keep it together and shine for your family
How do you do it
With visions of worst to come
Live in the present
And spin off the rays of sun

Oh little beam
Splitting the fog and the dirt in between
Oh simplify
Like a problem you try to work out in your mind
I would almost have to ask you
It's clumsy when said
So give me a spark I can look for instead
