

# Sleigh Bells, That Did It (Feat. Tink)

That did it, that did it

You's a cocky mother fucker cause you love to run your mouth  
They put me on the track cause they know I run this out of town  
So if your head's big then I aim at it, better chill with all of that talk  
Cause I go for miles, like a nine to five, and I still ain't take a day off  
I be on fire like I am in hell, bitches want out but I can't give 'em bail  
Sweetie, I ... like I should pull up with Sleigh Bells  
Don't be afraid now, what did you say now? All that talk  
I'm in your face now, what's wrong?

What's wrong? I thought you had this

You thought you ...

That did it, that did it

In the time it took to take a very deep breath  
You were out of your depth, out of your depth

You wan't a real fight tonight?  
You're still living in your own world  
The road isn't long, but it's winding  
The future isn't bright, it's blinding  
But a star is a medal on display  
Always earned the hard way  
And other lies and other rhymes  
Where'd I put my keys?  
Where'd I put my keys?

You aced the test, but failed the rest

Settle down with your infinite power

That did it, that did it
