

Slim Motion, Little Star

little star now you are truly shining
the little sky he designed for you
could you feel it was me that was coming
just to save what could fade away... in future days

where to start little star keep on shining
you've never left me lost in the dark
help me find help me find
a way to the sky he designed for you, oh little star

and in my favourite dream
which now came real
you're gonna feed me with light
to start my new life, right by your side

and in my favourite dream
which i'll dream with you
you're gonna need me to save, to save just to save... what could fade away
..in future days

i've been swimming around in circles
trying to chase what's been left of time
for you to see it was me who was fighting
for what could never fully be mine
for what could never fully be mine, little star

and in my favourite dream
which now came real
you're gonna feed me with light
to start my new life, right by your side

and in my favourite dream
which i'll dream with you
you're gonna need me to save, to save just to save... what could fade away
..in future days
