

Sloan, In The Movies

In the time it takes us to walk another city mile
we could do it in the movies
do it in the movies like what you're on about

by the time I show you
a reason why you're out of style
you could see it in the movies

clearly I don't even know what I'm doing
Or what I'm on about
it feels like somebody else's lights came on
I'll take another look around

and the feeling I get when I watch you
day in or day out
can make me feel I can turn it off or on

every day you wonder
if I can read between the lines
I could do it in a movie
do it in a movie - that's what it's all about

it feels like somebody else's lights came on
I'll take another look around
and I don't even know where I'm going
or where I'm coming from
and now I'm traveling down the autobahn
and I'm too afraid to turn around
and I can't even see where I'm going
but I'll take another look around

like they did in the movies
just like they did it in the movies
we could do it in a movie
