

# Sloan, Living With The Masses

Living with the masses  
Will always get you down  
And next to me they're teaching classes  
On how to really bring me down

I never asked for a neighbour like you  
To run around and around like a wrecking ball  
Is there some renovating you should do  
Maybe you should cut in the dark with your table saw

Always going faster  
Than the others down the road  
You should bring out the sandblaster, whoa-oh  
So I can really hear your workload

I never asked for a neighbour like you  
To run around and around like a wrecking ball  
There's so many other people just like you  
You're like the sights and the sounds of a nuclear war

The bomb-bay doors are opening  
(Bomb-bay doors)  
And soon they will be falling all around  
The bomb-bay doors are opening  
(Bomb-bay doors)  
And soon they will be falling all around
