

Slurpymundae, Who I Am

just say what you wanna say
just say what you wanna say
just say what you wanna say

never leave the edge that i cling to
i cross the line when i mean to
understand my words outspoken.
withstand the weight of my action
superstar in the coming attraction
heads up and play my witness.
can somebody show me?

i fill your need
i find the speed
now let it breed.
i fuel the flame
i call the name
never be the same.

want to be myself
got to see myself
who i am
where i stand
want to be myself
got to see myself
who i am
where i stand

i break the rule that you're making
i grant the truth that you're faking
say nothing lasts forever.
we take the road less traveled
we face the edge unraveled
you think i'm falling
but it feels like i'm flying

i fill your need
i find the speed
now let it breed.
i fuel the flame
i call the name
never be the same.

want to be myself
got to see myself
who i am
where i stand
want to be myself
got to see myself
who i am
where i stand

i want to be myself
i got to see myself
who i am
i want to be myself
i got to see myself
who i am

i want to be myself
i got to see myself
who i am
where i stand
i want to be myself

i got to see myself
who i am
where i stand
