

Smog, I Could Drive Forever

Too many lines have been broken
Too many people have crumbled apart
In my hands

I should have left a long time ago
The best idea I ever had

With every mile
Another piece of me peels off
and whips down the road
all down the road

I should have left a long time ago
The best idea I ever had

With every mile
A piece of me peels off
and whips down the road
All down the road

I should have left a long time ago
The best idea I ever had

I feel light and strong
I could drive forever

Too many lines have been broken
Too many people have crumbled apart
in my hands

I should have left a long time ago
The best idea I ever had

With every mile
Another piece of me peels off
And whips down the road
All down the road

I should have left a long time ago
The best idea I ever had

I feel light and strong
I could drive forever

With every mile
Another piece of me peels off
And whips down the road
All down the road
