

# Smoosh, Massive Cure

It's just a place where you can hide away and find a way  
You can recover from whatever you have done wrong  
You'll never be discovered, never have to show yourself  
You can hide till whatever time you want to  
Because we go away and never know why  
You can get discovered and never find yourself  
And you've got to go and never find  
And you can hide for the rest of your life

You can hide away and never be discovered  
And you can find a way before you have to go away  
And now when I for now I have to  
And you can never stop and never go away from  
No matter what you do, no matter what you do

It's just a place where you can hide away and find a way  
No matter what you say and what you do you'll never
