Snakepit, Good To Be Alive

(Slash/Gilby Clarke/Eric Dover)

You told me you're an orphan the same old standard line Then when we moved in together All you did was moan and cry Talkin' like you'd make it On life's big movie screen I had to say I loved you Just to try and keep the peace

Hustler What are you doin' with your time I'm slow to catch on But I think you wasted mine

You're running low tonight Jack up and get it right You know you're going down Ain't it good to be alive

I couldn't make excuses about everything you said You wanna show your bruises Let's throw a party for the band Now here they come a dancin' Like the powder to your nose Why don't you cut your head off Spite your face let's do the show

Hustler
What are you doin' with your time
I'm slow catchin' on
But I think you wasted mine
Hustler

You're running low tonight The station's right close by Pack up your car and drive Ain't it good to be alive

Tearing of the membrane
Of the first new thing in years
Found a nagging consolation
In a glass of Everclear
And the ugly truth has raped you
They're saying you're a lousy lay
But isn't everything that way

Ain't it good to be alive So good to be alive
