

Snapcase, Zombie Prescription

no representation of my voice
your prescription set to destroy
our persistence to boycott
silent partners you know we are not
we are the signs of the changing...
perseverance, we've come of age
collective interests to engage
we are the signs of the changing times
cut you down to size
these are changing
these are changing times
your preconceptions
condemning race
and your solutions they cramp our space
self-sufficiency
that is my goal
recognition of some self-control
