

Snitch, You Hold The Gun

So you think it's right
lurking through the night
taking peoples lives

the other side of you
tells you what to do
pull that trigger now

kill them here and kill them there
you are the one you hold the gun

it's all said and done
you're not the only one
it's something in your head

now you know you're wrong
singing your own song
and you'll live to regret
