

Snow, Africa

I will board the Irish ship so that I won't get left behind
I am going down to Africa to search what I can find
Through the trails and rivers and valleys I know there is a love that will me mine
I'm at the birth of the first mankind

I will lead the ghetti drumming til thy love comes home to me
I will ride the lion king to meet you somewhere in my dreams
I will sing with hopi birds and hang with hippo against the leaves
I'm at the birth of the first mankind

But when I'm all alone indside, it feels so hard dear
I'm in my heart without a thing to do
Africa's pretty, weather's fine and dandy
But I still haven't found love
It's true

I hear her voice and now I hear she's coming
So run about bees because the sun is so sweet
We talked all night and made love the next morning
But whether or not it is love
It's true

And let me just see you in the light
Golden safari and moonlit night
I can't believe this feels so real
I'm finally home
Put on your favourite song for me
Let down your hair, African breeze
Blows it around like your in love
In love with me

We will sail into the sunset, be as free as we can be
We will dance upon the stars and sing in perfect harmony
Join hands with African children give them love not poverty
Cause they're the birth of the first mankind

We can smile and joke and laugh and play the special tribal games
I will tell you how I feel and yes I hope you feel the same
And before you'll be my love and ever ever bear my name
We're at the birth of the first mankind

But when I'm all alone indside, it feels so hard dear
I'm in my heart without a thing to do
Africa's pretty, weather's fine and dandy
But I still haven't found love
It's true

I hear her voice and now I hear she's coming
So run about bees because the sun is so sweet
We talked all night and made love the next morning
But whether or not it is love
It's true

And let me just see you in the light
Golden safari and moonlit night
I can't believe this feels so real
I'm finally home
Put on your favourite song for me
Let down your hair, African breeze
Blows it around like your in love
In love with me

And let me just see you in the light
Golden safari and moonlit night

I can't believe this feels so real
I'm finally home
Put on your favourite song for me
Let down your hair, African breeze
Blows it around like your in love
In love with me
