

# Snow, Little Did They Know

Thanks to: Primetime

I've never been a man that really cares what people say  
You sit alone but now I wish that you would find your way  
Since you been in my life my days seem shorter and my nights with you so long  
Gotta feeling deep inside of me, you're tearing me apart  
Running through my veins you feel the pounding of my beating heart  
When you're gone, night or day trying to find peace of mind hideaway  
Or does she love me at all?

## CHORUS

(Little did they know)  
She's like the glitter in my eye  
(Little did they know)  
She's like the star in the sky  
(Don't want to let her go)  
Love is based on too many many lies  
Rain and the thunder she's taking me under

Got me feeling things that a lonely man can't understand  
Want her all the time but she only see's me when and if she can  
Who would ever thought that I could fall in love  
Somethings are better left unexplained  
Still I sit and wonder why, did my life just pass me by?  
Now I'm wrapped up in the games we play left me in this land alone

## CHORUS

Who am I a foolish man to think this way  
Addicted to your love, what a price to pay  
The people see me off the ground and dust me off again  
Little did they know

Jump down girl jump up in a this  
When you're in love you need no more wish  
Akie and Salt fish Queen of my dish  
You're the Queen of my heart  
The will that come first some of them want, them need The word is not heard...  
Rain and the thunder she's taking me under

## CHORUS
