

Social Code, Forever Always Ends

I knew that the masquerade was over
the moment I looked into your eyes
You told me we would always be together
(you said you would always be there)
But you lied to me again

Forever always ends
you're gone and now it's over
My friends were right again
I wish I never met you

Lights on and now the movie's over
You're gone and nothing feels the same
You told me we would always be together
(you said you would always be there)
But you lied to me again

Forever always ends
you're gone and now it's over

My friends were right again
I wish I never met you
Forever always ends
you're gone and now it's over
My friends were right again
I wish I never met you

Everything that you said
All your words painted red
I just can't wait to forget about you
Everything that you said
Was a gun to my head
I just can't wait to forget
About you

Forever always ends
you're gone and now it's over
My friends were right again
I wish I never met you
