# Social Code, The Best You Never Had

You
You never knew my name
but I loved you just the same
but before it started we were over
You were the star of everything
center stage and in my dreams
but when the curtain fell the dream was over

You thought that you were so much more
I thought I'd heard it all, I'd heard it all before
I'm the best you never had
and I had it bad
But now that we've seen you bleed
You come crawling back to me

Now
Reviews are coming in
they say that your act is wearing thin
But before we close you need to now it's all because
You thought that you were so much more
But I know that now's the time, it's time to shut the door

I'm the best you never had
and I had it bad
but now that we've seen you bleed
you come crawling back to me
I'm the best you never had
and now you want me back
you've fallen down to your knees
and come crawling back to me

And you're fading away (x4)

I'm the best you never had
and I had it bad
but now that we've seen you bleed
you come crawling back to me
I'm the best you never had
and now you want me back
you've fallen down to your knees
and come crawling back to me
