

Social Code, The Static

Just when I thought I had your attention
I see you shutter and shoulder looking
Feeling small, why wont you listen
You shake my hand like a politician
Pose for the shot is all your thinking
Oh yea you had my back from the beginning

You've always seemed so far away
Live the static and you'll burn away
You've always seemed so far away
Live the static and you'll burn away

All together the audience ahhs
Laugh track cued and trained applause
Nice denim jeans made with sticky fingers
Oh yeah you're looking sharp
Oh yeah you're looking sharp

You've always seemed so far away
Live the static and you'll burn away
You've always seemed so far away
Live the static and you'll burn away

Sensors read at critical
Somethings not quite right to me
We can make you better if you let us try
Just sit back and feel your own heartbeat slow

You've always seemed so far away
Live the static and you'll burn away
You've always seemed so far away
Live the static and you'll burn away
