

# Socialburn, Everyone

How was I to know you'd ever leave  
How was I to know you cared for me  
When every time I looked at you  
You acted like I was a fool  
How was I to know the truth

With all the times you ran away  
I never thought that you would say  
I'm the one who's lonely now  
And all the times I never said  
I love you Now you're in the bed  
with somebody and everyone else

How was I to know that I was wrong  
When I was talking during your favorite song  
How was I to know that I was right  
When I caught you in your lies the other night

With all the times you ran away  
I never thought that you would say  
I'm the one who's lonely now  
And all the times I never said well..  
I love you Now you're in the bed  
with somebody and everyone else

Everyone yeah (x3)  
With somebody and everyone else

But Somehow I know  
We're gonna be alright  
But Somehow I know  
We're gonna be fine

How was I to know that I was wrong  
When I was talking during your favorite song

With all the times you ran away  
I never thought that you would say  
I'm the one who's lonely now  
And all the times I never said well..  
I love you Now you're in the bed  
with somebody and everyone else

Everyone yeah (x3)  
With somebody and everyone else  
Everyone yeah (x3)  
With somebody and everyone else
