

Socialburn, Everyone

How was I to know you'd ever leave
How was I to know you cared for me
When every time I looked at you
You acted like I was a fool
How was I to know the truth

With all the times you ran away
I never thought that you would say
I'm the one who's lonely now
And all the times I never said
I love you Now you're in the bed
with somebody and everyone else

How was I to know that I was wrong
When I was talking during your favorite song
How was I to know that I was right
When I caught you in your lies the other night

With all the times you ran away
I never thought that you would say
I'm the one who's lonely now
And all the times I never said well..
I love you Now you're in the bed
with somebody and everyone else

Everyone yeah (x3)
With somebody and everyone else

But Somehow I know
We're gonna be alright
But Somehow I know
We're gonna be fine

How was I to know that I was wrong
When I was talking during your favorite song

With all the times you ran away
I never thought that you would say
I'm the one who's lonely now
And all the times I never said well..
I love you Now you're in the bed
with somebody and everyone else

Everyone yeah (x3)
With somebody and everyone else
Everyone yeah (x3)
With somebody and everyone else
