## Sodom, Bibles And Guns

They want to see our castles burning False religions from a wicked spell Commit crimes in ice cold blood The tortured souls to dwell

Born dead creatures live again Paralyzed to kill themselves Reality that disappears Forever buried dreams

The hate is spreading far away Or in the neighbourhood maybe When even life's collapse begins Just what we need

Bibles and guns

Seems like a monumental struggle Of good and mighty evil Everlasting devastation Until the death redeemed

Born dead creatures live again Paralyzed to kill themselves Reality that disappears Forever buried dreams

The hate is spreading far away Or in the neighbourhood maybe When even life's collapse begins Just what we need

Bibles and guns

The debris covered our hope To sleep the endless sleep Peace no longer rest in my brain My victim just for me

Born dead creatures live again Paralyzed to kill themselves Reality that disappears Forever buried dreams

The hate is spreading far away Or in the neighbourhood maybe When even life's collapse begins Just what we need
