

Solange Knowles, Crush

(Verse 1)

Come here stranger
Come and dance with me
Listen life changer
Don't fret take a chance with me
When you move like that, I can just fall
In love with you (in love with you)
You think I'm speeding
That's until you see
I wasn't I was leading the future for you and me
And when you move like that I can just fall
In love with you (in love with you)

(Chorus)

Close your eyes and move
Please don't think, just groove
Please, do that for me
Let them know, you're my baby

(Verse 2)

Speechless, enchanted, when I see you baby
Reachless romantic, just keep dancing baby
When you move like that, I could just fall in love you

Ooo keep climbing, make your mark in here
Your eyes keep shining though it's dark in here
And when you move like that I can just fall
In love with you (in love with you)

(Chorus)

(Bridge)

It's weird I know but somehow I know
I've been handed you, you've been handed me
It's like some fantasy
I like you, I want you
Dance with me, forever and ever

(Verse 3)

You're undecided you wanna mingle more
Your face just brightens when you think of me it's yours
And when you smile like that I can just fall, in love with you (in love with you)
Seems like the world suspects something baby
And they should pinch themselves cause they ain't dreaming baby
And when we get like that the whole world would just fall in love too (in love too)

(Chorus out)
