

Someday Never, In The Absence Of Your Love

Understanding what it is to cause infection
Undermines the very satisfaction of my affection
To see if there's nothing left and will never ever surface again

If you ask someone to change fresh like the day break hits at dawn
And if you wait for me and see there's nothing left to you and me
But our "could have been's..."

You know it's gone
You know it's gone, it's gone
Gone away

Bloodshed to bloodshed
A tarnished romance
Each day things get a little bit better
Better without you

You know it's gone
You know it's gone, it's gone
Gone away

In every corner of my eye the walls are caving in tonight, tonight
Another day, another token etched in my skin for our love
Our dead hopes

You know it's gone
You know it's gone, it's gone
Gone away

And don't you ever take me for granted...
That means you
Yes that means you
