

# Son Ambulance, Like A Friend

remember how we used to talk like swallows in an unborn child's throat when you told me  
I know I am going to love him - how can I already know?

Please don't give me no trouble because I'm pulled back like a mouse trap  
Seems I always come so unprepared for these challenges I have to face - now every face I pass is  
So I need to be brave as I crawl out to sea all by myself and that's insane  
But my friends will keep me afloat  
Where fear try and pull me in  
Mm-hm, yeah - the fear can drag you down  
But your friends will help you out  
Get back up on your feet my friend

Oh, how we used to daydream in the valleys where giraffe-neck trees grew  
When we went to high school  
Yeah, we learned a lot  
How to become what we are not  
And I watched this bridge here just disappear - yeah, your parents can't carry you no more  
By by by, by now you will fear no one  
By by by, by now your faith will be restored like a friend I met just a second ago

Like a friend I met just a second ago  
Everyone is thinking too much  
And we laugh at ourselves and I think I'm wrong but I never really know
