

# Sonic City, Stay With Me

Sister come and rescue me  
I'm sinking out in the sea  
A river runs down a lonely road  
Where's a castle where I can sleep  
Begin to dream

Too many times I've fallen down  
Falling can make us weak  
Where were you when I needed more  
Erase these memories  
Into a shallow stream

Stay here with me one night is all I need  
Because all this could be so much more  
If you can learn to see

I wish I could be more like you  
Wrap my arms around your truth  
You can never take away  
The light keeps shining through  
It breaks through

Stay here with me one night is all I need  
Because all this could be so much more  
If you can learn to see  
Stay here with me one night is all I need  
All this could be so much more  
If you can learn to see

This is me calling you  
This is me calling you

Stay here with me one night is all I need  
All this could be so much more  
If you can learn to see  
Stay here with me one night is all I need  
All this could be so much more  
If you can learn to see

This is me calling you  
This is me calling you
