

# Sonic Syndicate, Callous

Cathode rays blast like meteor rain to my brain  
Still I'm using all the tools to escape my reality  
Forced myself to not sleep, forced myself to not see  
That something has survived and you feel it too...

Loneliness is a good place to visit, but not to stay in  
It was the only way to finally break out off the chains

(Chorus)

If I was brave enough to fall  
I'd find the answers  
If I was strong enough to work it out  
Would you ever even care?

Returning from my exile with a heart full of emptiness  
But I know you won't trespass my brain anymore  
Took me time to cleanse it, took me time to realize  
That I'm sentenced to life and you fear it too...

Loneliness is a good place to visit, but not to stay in  
It was the only way to finally break out off the chains

(Chorus x3)
