

# Sony James, I Wish This Night Would Never End

Oh how short has been this evening  
Since my date with you began  
Oh how long will be tomorrow  
I wish this night would never end

Short has been the stroll to your house  
With you walking hand in hand  
Long will be my homeward journey  
I wish this night would never end

Every step that we take brings us nearer  
To your door where this evening will die  
Every tick of the clock, every beat of my heart  
Brings us closer to saying good bye  
You are warm and yielding, as I hold you  
My lips find yours and they blend  
Let's linger here upon your doorstep  
And wish this night would never end

Every step that we take brings us nearer  
To your door where this evening will die  
Every tick of the clock, every beat of my heart  
Brings us closer to saying good bye  
You are warm and yielding, as I hold you  
My lips find yours and they blend  
Let's linger here upon your doorstep  
And wish this night would never end
