

# Sparks, Popularity

(Ron & Russell Mael)

I like you and you like me a lot  
And we do those things that can make us feel hot  
Then we join some friends, all of them are all right  
And we talk a while, then we climb in our cars

What a night, we all drive into town  
Where we'll park our cars, and meet the rest of our friends  
At a place that's called, I forget what it's called  
But it's really great, and all our friends will be there

I like you and you like me a lot  
And it's nice to be all alone with you too  
But it's also nice being out with our friends  
Cause they're all all right, maybe that's why we're friends

I feel great, but it's getting real late  
So I'll drive you home and you'll slide up real close  
I'm so glad we met, and I like you so much  
And I'm also glad that I got all those friends
