

Sparta, Trapeze

From the top of buildings you'll shout
To the kids in the street below
And you'll know
She swings with the ease of a hammer
From the edge down to the ground
And you'll know

What's right what's wrong
And you know it
But you can't do it
Try hard to find
A way to move up in life

Set a fire to cover your path
And you should know
I get the last laugh

The tents will sigh
This will change everything
