

Spiritual Front, First Love Never Dies

All at once I miss you
So long since I've kissed you
How I love to look into your eyes
Yes I still dream about you
My world is lost without you
For you are my first love, and
First love never ever dies
Whenever I feel lonely
I'm thinking of you only
One last kiss and then we said goodbye
The love I left behind me
Comes back to remind me
That you were my first love, and
First love never ever dies
The love I left behind me
Comes back to remind me
That you were my first love, and
First love never ever dies
And if you're thinking of me
And you find that you still love me
There's no use to go on living lies
Let's hurry to each other
For there could be no other
Yes, you were my first love, and
First love never ever dies
First love never ever dies
