

Spitalfield, You Can't Stop

I've been thinking how to tell you off
Why do you forget everything i say?
How can i always find the time to spend with you
While you focus everything on me?

This time dont close your eyes
And take your time
Its your time
I've been thinking of this for too long
Who knows what to say now?
If this is getting over him from now on
Honestly, your not

You call and ask for me the time(its almost two)
You think you'd just look at your watch
Why can't you forget everything you thought you knew?
And stop pretending its the truth

This time dont close your eyes
And take your time
It's your time
I've been thinking of this for too long
Who knows what to say now?
If this is getting over him from now on
Well Honestly, your not

focus, focus, focus,

This time dont close your eyes
And take your time
It's your time
I've been thinking of this for too long
Who knows what to say now?
If this is getting over him from now on

You can't stop it now no,
You can't stop me (you can't)
Stop me (you won't)
Stop it now
