

Spleen United, Into The Future

Into another another world in need
Into another another world in me
Rise from the under the undertow's relieves (?)
Rise from the underworld and the underworld's defeat (?)

Into the future future
Into the future future

Batteries to power and turbines to speed
Into the future the future with me
The d in self-destruction speedball and weed
Into another world another world in need

Into another another world in need
Into another another world in me
Rise from the under the undertow's relieves (?)
Rise from the underworld and the underworld's defeat (?)

Into the future future
Into the future future
