

SR-71, Best Is Yet To Come

You see yourself through, you're so small
Running into every brick wall
It's not as far as you can go
The road is twisting, turning
Our life is living, learning
There's so much more for you to know
If you could, lock the past away
step back through the doorway
This ride has just begun
If I could, change your point of view
Is there some way I can show you
The best is yet to come
Not every problem can be solved so easily
Not every answer is the one
Above the flood of emotion
It's all about forward motion
Define your place in the sun
If you could, lock the past away
step back through the doorway
This ride has just begun
If I could, change your point of view
Is there some way I can show you
The best is yet to come
Try to hide, it's all inside
Look and find a place where the pain and you can follow it
If you're spitting truth, bullet proof,
crashing through the walls that separate me and you
Now you're fine with every thing you lose
Your path clears with everything you choose
This life has just begun
