SR-71, Best Is Yet To Come

You see yourself through, you're so small Running into every brick wall It's not as far as you can go The road is twisting, turning Our life is living, learning There's so much more for you to know If you could, lock the past away step back through the doorway This ride has just begun If I could, change your point of view Is there some way I can show you The best is yet to come Not every problem can be solved so easily Not every answer is the one Above the flood of emotion It's all about forward motion Define your place in the sun If you could, lock the past away step back through the doorway This ride has just begun If I could, change your point of view Is there some way I can show you The best is yet to come Try to hide, it's all inside Look and find a place where the pain and you can follow it If you're spitting truth, bullet proof, crashing through the walls that separate me and you Now you're fine with every thing you lose Your path clears with everything you choose This life has just begun
