

# Starfield, Drowning Out The Melody

Drowning out the melody  
Tim Neufeld, Dave Miller, Jon Neufeld

This world's so captivating  
There's so much more to put faith in  
Everybody's offering me my 15 minutes of fame  
It wraps it's arms around me  
It's whispering songs of freedom in my ear  
It's tellin' me that I can be a superstar  
It's telling me exactly what I want to hear

But Your harmony is drowning out the melody  
It's raging inside my head

I tried to hide  
But it was spinning round me pulling me inside  
I opened my eyes  
Just in time to see my worlds collide

Your love is changing my mind  
The world around me starts to fade away  
And I'm being refined  
You're bringing dawn to a brand new day

This world's so captivating  
So much to put my faith in  
So many melodies  
competing for the right to be my song  
It's an unrelenting ambush  
Gonna find true love with just one more push  
Gonna find my solace just over this next hill  
Gonna reach Nirvana, gonna get my fill

You're making black and white the gray  
You've replaced tears with Joy, and Night for day
