

# Stars, My Favourite Book

I was always late  
You never afraid  
That we could be fallin'  
All our friends would say  
That maybe we should wait  
But they can't see what's comin'

And to this day  
When everything breaks  
You are the anchor that holds me

And that is why we'll always make it  
How I know your face  
All the ways you move  
You come in, I can read you  
You're my favourite book  
All the things you say  
The way you shift your eyes  
I never knew there was someone  
To make me come alive

When the days are long  
And the thunder with the storm  
Can always get me cryin'  
But you can make my bed  
I'll fall into it  
Shattered but not lonely

Cause I never knew a home  
Until I found your hands  
And when I'm withered  
You come to me, you're my best friend

And that is why we'll always make it  
How I know your face  
All the ways you move  
You come in, I can read you  
You're my favourite book  
All the things you say  
The way you shift your eyes  
I never knew there was someone  
To make me come alive

And when we're making love  
I give everything up for your touch

How I know your face  
All the ways you move  
You come in  
I can read you, you're my favourite book  
All the things you say  
The way you shift your eyes  
I never knew there was someone  
To make me come alive

And when you go to work  
All the day I wait  
For you to come home  
Makin' our time  
In our little place  
Our little place  
Our little place
