Stars, Tru

True
What the man say is true
All he's been telling you
Vapor trails align at evening time

We flew In from the Cote D'Azur Wearing our shades and sure We were good to go in our Peugeot

We die
Each day and every night
Follow the swallows' flight
And we drank champagne like it was rain

We try
Try to outlast the day
Let that lone drummer play
Hell, I ain't afraid of the choice I made

It's true All of this is true All I've been telling you From this rhyme it's the killing time, it's true

It's true, it's true, it's true... True, true, true...

Helped by navigation so we went to the map Half the way to China and we never came back

Helped by navigation so we went to the map Half the way to China and we never came back

That night
Under the vineyard sky
We kissed and the world cried
As we hit descend and reached the end

So young Deep in our hearts we knew All I've been telling you is true

It's true
All of this is true
All I've been telling you
From this rhyme it's the killing time, it's true
All of this is true!
