

# Starsailor, Talk Her Down

You came waltzing in  
Where the love had been  
And the boys all looked around  
Let me stay while you talk your baby down

I came waltzing in  
Where the light had been  
And the girls all looked away  
Let them stare while we make our getaway

You came waltzing in  
Where the light had been  
And the dark was all around  
Let me stay while they all fall to the ground

I was hiding from the weather  
She was recently estranged  
When she put me back together  
Didn't even know her name

You came waltzing in  
Where the life had been  
And the death was all around  
Let them stare while they all fall to the ground

You came waltzing in  
Where the love had been  
And the girls all looked away  
Let me stay while they make their getaway

I was hiding from the weather  
She was recently estranged  
When she put me back together  
Didn't even know her name

You came waltzing in  
Where your life had been  
It was nowhere to be found  
Take me back to the place where we were bound

You came waltzing in  
Where the love had been  
And the boys all looked around  
Let me stay while you talk your baby down

I was hiding from the weather  
She was recently estranged  
When she put me back together  
Didn't even know her name
