Start Trouble, Get Over It

If someone ever needed to leave it all
It'd be you, and as a matter of fact
You do put the poison in your head
When you wake up out of bed
Cuz you live in a nightmare
I care too much to see you go down like this
You're the person that I really thought I'd never miss

Pre-Chorus
I'm a touch out of mind and I'm waitin for you
So be there, I'll be fair, I'll be real with you

Chorus
Move along, stay strong
Get over it, get on with your life (x2)

Bridge
And when you reach for me
You start feelin sober
And when you need to believe
It's almost over

Every day is the same routine
Feelin sorry for yourself 'cause of broken dreams
The more I think about it the more it makes me sick
In the back of my head I'm screamin "Get over it"
Do ya wanna run away and never change
Do ya wanna stay locked in your fuckin cage

Pre-Chorus
Chorus (x2)

Some people never change (some people never change)
Some people never change (some people never change)
Some people never change their lives

And I'm waiting for you
I'm waiting for you
I'm waiting for you

Chorus (x2)
