

# Status Quo, I Know You're Leaving

(Van Tijn/Fluitsman)

You say you're tired of this love affair  
It brings you down close to despair  
Our love has fallen apart at the seams  
I was too taken, lived in a dream  
All I want is to be around you  
So I cry, yes it's all I can do

I know you're leaving but I can't understand  
Why what we have must come to an end  
Somebody tell me what can I do?  
I know you're leaving but I still love you.

You used to hold me, hold me so strong  
I never thought we could ever go wrong  
Had no intention to fence you in  
Give you affection was my only aim  
I will learn not to be around you  
So I'll cry, yes it's all I can do

I know you're leaving but I can't understand  
Why what we have must come to an end  
Somebody tell me what can I do?  
I know you're leaving but I still love you.

It's an emptiness you leave behind  
Broken memories and fate to remind me  
What's been done can't be turned around  
And hope has become misery

I know you're leaving but I can't understand  
Why what we have must come to an end  
Somebody tell me what can I do?  
I know you're leaving but I ...

I know you're leaving but I can't understand  
Why what we have must come to an end  
Somebody tell me what can I do?  
I know you're leaving but I still love you

I know you're leaving, this time it's goodbye  
Baby but I still love you  
I know you're leaving, this time it's goodbye  
Baby but I still love you  
I know you're leaving, this time it's goodbye  
Baby but I still love you
