

# Steel Train, Helicopter

i am somewhere in the city climbin' up a fire escape  
see i am somewhere in the city climbin' up a fire escape  
you know i got to save my baby from the mess that this world has made

oh i arrive through a window  
leave through a hole in the wall  
see i arrive through a window  
leave through a hole in the wall  
you know i got to save my baby as i carry her cradle and all

helicopter, helicopter  
let your long rope down  
you see i swing beneath the sunset  
done all that i can do in your town

violence has taken wind out of my sails  
violence has taken wind out of my sails  
you know i got to save my baby from the mess that this world has made

helicopter, helicopter  
let your long rope down  
you see i swing beneath the sunset  
done all that i can do in your town

i am somewhere in the city climbin' up a fire escape  
see i am somewhere in the city climbin' up a fire escape  
you know i got to save my baby from the mess that this world has made
