

Stella Soleil, Angel Face

Angel I imagine your body
It tingles me in the night
You are my obsession
And I want to get this right
You lap me up for hours
Until it was light
And covered my body with flowers
And rushed me to delight
And come on boy
Angel face
Wrap me up I can't wait

I remember the dress
I was wearing
It hung loosely
It was a hot and sticky summer
And you tore it off of me
And come on boy
Angel face
Wrap me up
I can't wait

All the people will come
And people will go
He's the one lover
I can't let go

All the people will come
And people will go
He's the one lover
Sent to me from above

I have been gone for so long
But he's still around me
Life just goes on
Its seems so wrong
How he still surrounds me

And come on boy
Angel face
Wrap me up
I can't wait

All the people will come
And people will go
He's the one lover
I can't let go

All the people will come
And people will go
He's the one lover
Sent to me from above

Angel I imagine your body
Tangled up with mine
