

Stereo 360, Sick Of You

(Hills/Zimmerman 2:59)

I've got no reason to live today
I was born into nothing
All you want to do is lye awake with me
And drive ourselves crazy

I don't want to meet you underground
Cause it won't take long to hate me
I've been wanting just to get away get away
And find a better place to be

You You
You already knew that the time would come
When I'm already sick of you
And I, I already knew that the time would come
When I'd finally get sick of you

All I ever do is sit around
That's the way to be
When you look like me
I'm not much for fashion
But let's try to undress our way out of this mess

Break it down
Don't make a mistake
When I'm down
Get out of the way
Enjoy your life poolside

You You
You already knew that the time would come
When I'm already sick of you
And I, I already knew that the time would come
When I'd finally get sick of you
