Stereo 360, Sick Of You

(Hills/Zimmerman 2:59)

I've got no reason to live today I was born into nothing All you want to do is Iye awake with me And drive ourselves crazy

I don't want to meet you underground Cause it won't take long to hate me I've been wanting just to get away get away And find a better place to be

You You You already knew that the time would come When I'm already sick of you And I, I already knew that the time would come When I'd finally get sick of you

All I ever do is sit around That's the way to be When you look like me I'm not much for fashion But let's try to undress our way out of this mess

Break it down Don't make a mistake When I'm down Get out of the way Enjoy your life poolside

You You You already knew that the time would come When I'm already sick of you And I, I already knew that the time would come When I'd finally get sick of you
