

# Stereoside, Little Pill

I know the enemy  
The drugs that you been takin'  
I hope it helps you through  
And I know its hard to say  
Everything that you feel today  
But trust me I feel that too  
And every day's just another maze  
Another x on the map of faith  
But I dont need a little pill to get me through  
I dont need a monkey on my back  
I dont wanna fall in love like that  
I dont need a little pill to get me through  
The way you do  
The way you do  
I know what you really need  
But you cant trust what you fail to see  
And I only wanna help you through  
I cant change what I cant explain  
An epidemic like a new kind of Sunday  
But I dont need a little pill to get me through  
I dont need a monkey on my back  
I dont wanna fall in love like that  
I dont need a little pill to get me through  
And I dont need a monkey on my back  
I dont wanna fall in love like that  
I dont need a little pill to get me through  
The way you do, The way you do  
And I hope it helps you through  
I dont need a monkey on my back  
I dont wanna fall in love like that  
I dont need a little pill to get me through  
I dont wanna monkey on my back  
I dont wanna fall in love like that  
I dont wanna little pill to get me through,  
The way you do  
The way you do  
The way you do  
Well I hope it helps you through
