## Steve Earle, Close Your Eyes

I dreamed you were standing On the edge of the world And I thought I heard you call out With one foot on the rock And one a cloud Was it just the wind that I heard Close your eyes This world won't stop spinning you know Close your eyes Why don't you just let go Thousands of people searchin' out there Most of em lookin' for love But nothing is something That there's plenty of In time we'll all get our share When I was a child And they put me to bed They always took care that I prayed But the part that goes, if I should Die fore I wake Echoed all night in my head
