## Steve Kilbey, Threshold

I can barely bear to be with you tonight I can hardy stand to see you in this light How can I even try to deny it I can barely bear to be with you tonight

How long will you keep me waiting

I can only hold you in the dream tonight
I won't even think what claims you've made tonight
How can I even try to deny it
I can only hold you in the dream tonight

[repeat verse 1]
