## Steve Lukather, Fall Into Velvet

I was born as me alone Isolation far from home I was nurtured in the light Mother's milk pure and white I was told of a secret To close my eyes Fall into velvet

What I fear This childhood dream Must be real I can feel it Now I understand This comfort of man Take my hand Fall into velvet

(cindy) You can touch where you've never been touched See further than you've ever seen Fall into velvet

I was touched by those who know Of this power to fly alone As the path will twist and wind Leave for others, as we find So the future may collect Close their eyes Fall into velvet

What I fear This childhood dream Must be real I can feel it Now I understand This comfort of man Take my hand Fall into velvet Fall into velvet

(cindy) Fall into the spirale circle Life supplies the mind's survival (repeat 2x)
