Steve Wariner, Everything's Gonna Be Alright

Too little money, too many tears
What can I say, I guess it's just been one of those years
No need to worry what good does it do
Darlin' turn out the light and
Tell me that you love me too

Everything is gonna be alright
I can see the future shining bright
Just when things get tight
It's no time to lose heart
Everything is gonna be alright
We can make it through the darkest night
If we're in each other's arms
Everything will be alright

Fires are burning on faraway shores
Seems like the world forgot what it's been turning for
We've got our problems, tell me what's new
Darlin' just take my hand and
Together we can see it through

Everything is gonna be alright
I can see the future shining bright
Just when things get tight
It's no time to lose heart
Everything is gonna be alright
We can make it through the darkest night
If we're in each other's arms
Everything will be alright

Instrumental

Everything is gonna be alright
I can see the future shining bright
Just when things get tight
It's no time to lose heart
Everything is gonna be alright
We can make it through the darkest night
If we're in each other's arms
Everything will be alright

Everything is gonna be alright
I can see the future shining bright
Just when things get tight
It's no time to lose heart...
