

# Steve Winwood, Shining Song

Baby's eyes - feel them looking at me  
Realize what I would have her see  
Realize how dark this world can be  
That's why I better keep shining, shining, keep shining right down the line  
Love's a light - it keeps leading us on  
When it's right, it'll shine till we're gone  
keep it bright out there in the unknown  
You know we better keep shining, shining, keep shining right down the line  
Here's my shining song, I hope you can see it  
Here's my shining song, from the heart  
Here's my shining song, and I know you need it  
If we keep shining on, we'll never shine alone  
Love the night, 'cause that's when I hold you  
Feel the might of all the things we do  
Oh, the sight when we're both coming through  
I love you 'cause you keep shining, shining  
Keep shining right down the line  
So shine - just show the world how bright the world can be  
Let it shine - so every heart can see  
Shining star - lead us on through our lives  
You're so far, but your light still arrives  
Shining star, shine for all who still cry  
It helps to know you're still shining, shining  
You're shining right down the line
