

Steve Winwood, That's Love

One day you're up - next day you're down
She got your head spinning around
That's love, it's happening all the time
You walk out the door, head for the train
Then in a while, you're back again
That's love, you'll never change the world
Not in a million years
And I know that I could never live without you girl
You stood by me

All through the good times
And through the bad times
One gentle heart easily burned
After a lifetime you still haven't learned
That's love, it's happening all the time
Young couple are going insane
Fussing and fighting then they make up again
That's love, you'll never change the world
No no no no
