

# Stiff Little Fingers, Big City Night

Stop and go on an empty crossing  
The lights keep changing to only their hum  
And standing in line along the kerb  
The binbags wait till the morning comes  
You hear yourself walk echo lonely  
See shadows move in every door  
Are you sure that's your own footsteps behind?  
Is there really nothing to turn round for?

[Chorus:]

And you feel that you're always gonna walk the city streets all on your own  
The night is dark as a car crawls by  
And the road goes on and on  
They don't care about you  
They never even think about you  
Cos they're gonna do without you .... and you're gone

Just another big city night

Over your shoulder, round every corner  
Remember what's happened to people you've known  
Watch for yourself cos no-one else will  
You're gonna get it if you're alone  
Suddenly a stab from a knife out of nowhere  
Jumped from behind like they always do  
It only makes one line in the paper you read  
Somebody got it .... but it wasn't you

[Chorus]

Just another big city night  
Who's it gonna be tonight?
